### **CDCA Staff**

Paula Callahan Executive Director

Dee Dee Phillips Administrative Coordinator

## CDCA Update:

### 2022 Key Accomplishments

#### <u>2022 – Key Accomplishments</u>

Advance CDCA's Brand Recognition and Awareness of the Defense Industrial Base to community and Stakeholders

- 1. The CDCA continued to strengthen our partnership with organizations like the Charleston Metro Chamber of Commerce (CMCC), Charleston Regional Development Alliance (CRDA), The Patuxent Partnership (TPP), and the Defense Alliance of North Carolina (DANC) to further mature symbiotic, win-win relationships.
- 2. The CDCA ended 2022 with a 14% increase in membership at 291 total member companies.
- 3. Our partnership with Judge PR yielded an expansion of our social media and membership platforms to communicate events and relevant information.
- 4. The CDCA continued to deliver value to each one of our members through 2022 by holding three (3) in-person SBIOI events that attracted at least 450 attendees per event with one eclipsing 500!
- 5. Our 15th Annual Defense Summit returned to the Charleston Convention Center, where we expanded our footprint by more than 25,000 sq ft and brought together a crowd of nearly 1,850 government, military, and industry participants shattering previous attendance records.

#### Increase and Diversify Business in Charleston

- 1. CDCA continued to monitor and push for the USCG's expanded Super Base presence in Charleston to increase business opportunities for both NIWC-LANT and industry. The USCG remains committed to a 10-year plan of having the Super Base open in Charleston.
- 2. Our 2022 Summit featured Executive Directors and leaders from multiple additional warfare centers and aligned agencies representing a significant step toward expanding both the scope and size of the event in intentional ways that yield more value for all participants.

#### Partner with NIWC Atlantic on Relevant Portions of the Agency's Strategic Plan

- 1. CDCA met regularly with key NIWC Atlantic leaders to ensure CDCA priorities aligned with strategic NIWC Atlantic objectives all aimed at maximizing opportunity for our member companies.
- 2. Bi-weekly meetings were set up with Lowcountry Tech Bridge team to monitor tech bridge developments and support their industry engagement initiatives (i.e., Tech Tuesday events, Prize Challenges, etc.).
- 3. The CIC has continued to meet regularly and the Business partnership between NIWC Atlantic and industry continues to grow strong. The forum is always soliciting industry for ideas to enhance processes, increase efficiency, and improve the acquisition process in support of NIWC Atlantic's mission and the warfighter.

#### Enable Deployment of the talent base (with schools, employers, and training resources)

- 1. CDCA continued to grow our relationship with the South Coast Cyber Center (Beaufort, SC) to learn more about state level initiatives in play to accelerate growth in South Carolina's cyber talent.
- 2. CDCA has grown to have four major initiatives: Internships, Apprenticeships, Training Offerings, and Labor Category alignment for interns and apprentices.
- 3. Another Annual Summer Internship program for member companies was executed successfully.
- 4. An initiative to "give back to our community" by exploring potential support of Trident Technical College's Youth Apprenticeship Program, was embarked upon. This program is specifically designed to develop our rising youth workforce in a wide range of potential career fields, a number of which could lead to a future career in the defense contracting industry.

#### 2023 – Leaning Forward

Our Board of Directors and Staff held our first 2023 offsite event on 27 January. During it, we leveraged our strength, weaknesses, opportunities and threats (SWOT) analysis to develop actionable strategies that will advance our mission as we seek to deliver even more value to our members.

Here are a few of those that we look forward to delivering on:

- 1. Leverage a new Association Management System (AMS) so that we may provide more meaningful engagement to our members.
- 2. Define the parameters of an Advisory Council to help mentor our Board of Directors through the navigation of our strategy.
- 3. Develop a plan to foster a more symbiotic relationship between Small Business and Large Business member companies.
- 4. Further define the CDCA leadership process to include both pipeline management and board member development.
- 5. Continue to build our CDCA volunteer base and ensure the seamless integration of volunteers into our need areas.
- 6. Continue to increase our outreach to aligned stakeholder organizations.
- 7. Develop a more comprehensive organizational marketing and communications strategy.
- 8. Evaluate ways to better consider our members to include potentially the development of a larger scale engagement survey.
- 9. Strive to provide more valuable information to our members which allows them to grow their companies.

Teamwork remains vital to our success, and we have an excellent one that remains laser focused on creating value for you. While there will be much more to share in the coming months, the aim of this note is to thank you for the trust you have placed in us and to let you know that we have very much already rolled up our sleeves and gotten to work.

## CDCA Update:

2023 Leaning Forward

CDCA Membership Check-up: Are you getting the full benefit of your CDCA membership?

### Actions:

Login to <u>https://www.charlestondca.org/membershome1</u>
 Make sure your member information is up to date

 Check company logo – is it current?
 Make sure POCs, POC emails and phone numbers are accurate
 Company description and web address - are they correct

If you need assistance with your member login, please contact the CDCA Operations Executive, Paula Callahan, at <u>paula@charlestondca.org</u>

## **Member Survey**

In an effort to improve our service to members, the CDCA is conducting a brief survey.

The results of the survey will allow the CDCA to collect valuable feedback from our members, make improvements to the CDCA, and show our members we genuinely care about their thoughts and happiness. It will also help us gain knowledge of the value each member is getting out of our organization, which will help us prioritize where we need to devote our efforts. Ultimately, CDCA exists to meet our member's needs.

To complete the online survey, scan this QR code or click on the link below:

https://vevox.app/#/m/181081207/survey

All answers will be kept completely confidential and will not be used for any other purpose.

Thank you for time and sharing your opinions.

## Contracts Industry Council "CIC"

**Purpose:** To increase the degree of integration and quality of the business partnership between Naval Information Warfare Center, Atlantic (NIWC Atlantic) and Industry.

Call for CIC Nominations will go out in May 2023

### "Give Back to the Community, Invest in Our Industries Future"

#### Trident Technical College, Division of Apprenticeship and Employer Partnership

- Apprenticeships available in many fields, a number of which are directly related to our various member companies
- Formed in 2014 between TTC and a consortium of Industry Partners
- Why become an Industry Partner
  - Access to aspiring 16-18-year-old apprentices
  - Recruit and screen potential employees
  - Qualify for a \$1,000 tax credit per youth apprentice
  - Workers compensation, tuition, books, and other fees are covered
- The "ask"
  - Hire the apprentice part-time during the school year and full-time during the summer over a two-year commitment
  - Manage the apprentice's OJT
  - Evaluate the apprentice's progress before advancement to the next pay level
  - Recommend and "Award of Completion" certificate upon satisfactory fulfilment of program requirements
- If interested please contact the Education and Workforce Development Committee
  - <u>education@charlestondca.org</u>
  - Chair: Ron Ravelo, Co-chairs: Maura Keenan and Sallie Sweeney

## Mr. Manny Lovgren Vice President Charleston Defense Contractors Association

Annual CDCA Defense Summit Update

The Charleston Defense Contractor's Association (CDCA) has collaborated with the Naval Information Warfare Center, Atlantic (NIWC LANT), here in Charleston, SC for more than a decade to present an annual conference.

This year, 2023, CDCA has decided to expand the event to a broader conference, similar to "AFCEA West". Thus, The **Eastern Defense Summit** was created! The first rendition of this modified format will occur, this year, in December 2023.

#### Description

### Join CDCA for the 2023 Eastern Defense Summit as we examine the theme, *Collaborating on actionable solutions for our Nation's pacing threats*.

China and North Korea present our biggest threats.

- Senior U.S. Defense Officials cite the Indo-Pacific security environment as growing more complex with more aggressive behavior by both China and North Korea.
- The Office of the Director of National Intelligence, U.S. has warned of threats against the U.S. posed by China, Russia, North Korea, and Iran. The U.S. intel agency released its 2023 annual threat assessment report.
- Global challenges like climate change, and evolving technologies could have the potential to disrupt traditional business and society while creating unprecedented vulnerabilities.
- If China succeeds in gaining control over Taiwan, it will have "wide-ranging effects, including disruption to global supply chains for semiconductor chips because Taiwan dominates production of cutting-edge chips."
- And regarding cyber and technology, the U.S. intelligence community has assessed that China represents the "broadest, most active, and persistent cyber espionage threat to U.S. Government and private-sector networks."
- China is "capable of launching cyberattacks that could disrupt critical infrastructure services within the United States, including against oil and gas pipelines, and rail systems."
- China is rapidly expanding and improving its artificial intelligence and big data analytics capabilities, which could expand beyond domestic use.
- The U.S. intelligence community assessed that North Korea is continuing its efforts to enhance its nuclear capabilities, targeting the U.S. and its allies.
- North Korea's military "will pose a serious threat to the United States and its allies by continuing to invest in niche capabilities" designed to provide Kim Jong Un with a "range of options to deter outside intervention, offset enduring deficiencies in the country's conventional forces, and advance his political objectives through coercion."
- North Korea's chemical or biological weapons "remain a threat." The report states that the intelligence community is "concerned" that North Korea "may use such weapons during a conflict or in an unconventional or clandestine attack."

#### **Event Overview**

The Charleston Defense Contractor's Association is excited to welcome participants to the **2023 Eastern Defense Summit.** On December 6 -7, 2023, world-leading experts from across the Department of Defense, Information Warfare community, Intelligence community, industry, and academia will gather under one roof, to better understand and address today's technology challenges and threats faced within our defense industry. This event is one of the largest defense-focused events on the East Coast.

The theme of this conference - *Collaborating on actionable solutions for our Nation's pacing threats* – represents the necessity to envision near-term solutions to such challenges. The **Eastern Defense Summit** serves as a mechanism for defense industry leaders to collaborate on innovative solutions, and other focus areas to enhance interoperability across Defense Assets. By presenting Exhibit Demos, Keynote Addresses, Innovation Spotlights, and High Energy Tech Exchanges, the Summit will provide an opportunity for all representatives to form workforce partnerships that result in achieving a National Defense tactical edge no adversary can match.

The Eastern Defense Summit will be an immersive in-person event located at the Charleston Area Convention Center in North Charleston, SC, a short drive from the Charleston International Airport. The convention center is conveniently located within walking distance to several hotels, restaurants, shopping, and other attractions. We look forward to seeing you 6-7 December2023.

The Innovation Pitch Jam will remain a keystone event of the Eastern Defense Summit in December. We are collaborating stakeholders including NIWC Atlantic to make this a great event! Details to follow this summer.

## **PEO Digital Strategy**

#### **OUR MISSION**

We deliver modern, secure, and effective enterprise Information Technology and Business systems and services.

#### **OUR VISION**

To provide the premier enterprise Information Technology user experience.

#### **OUR GOALS**

### Develop and Maintain an Engaged and Capable Workforce

- Develop a Learning Organization
- Encourage and Support Decision-Making at Lower Levels
- Increase Focus on Human Capital and Talent Management

#### Advance the Modern Service Delivery Model

- Adopt Architectures and Industry Frameworks to Achieve Industry Parity
- Create and Configure Management Practices for Contemporary IT Operations
- Coordinate Acquisition and Contract Administration
- Increase the Effectiveness of Invested Funds, Maximize Return on Investments

#### **Build an Enterprise-Class Digital Platform**

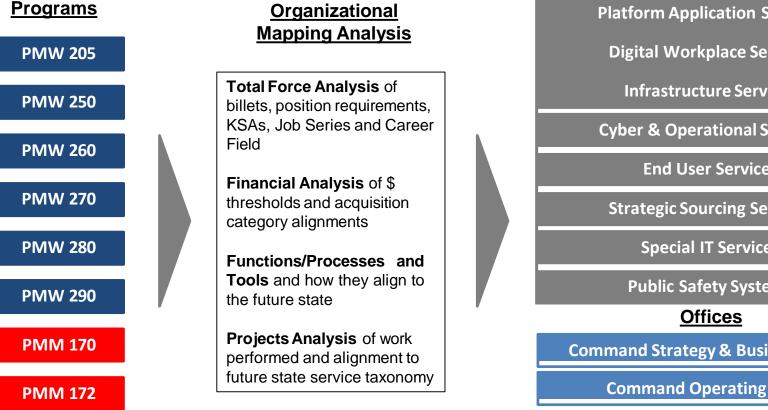

- Naval Enterprise Service Integration and Convergence
- Deliver an Integrated Digital Platform for the Future
- Establish Parity with Industry Technology and Capabilities
- Increase the Pace of Cloud Adoption
- Build and Maintain an Operating Capability that Enables Cyber Superiority

#### **Achieve Customer Centricity and Credibility**

- Expand Intuitive Service Acquisition and Support
- Anticipate and Respond to Customer Needs
- Enhance the User Experience

PEO Digital dissolved its Program Management Offices, and moved their associated products, services, and work into eight new Portfolios and two enabling Command Offices.

Program activities and personnel were mapped based on an analysis of Total Force, Financials, Functions/Processes and Tools, and Work performed.

#### **Portfolios**

**Platform Application Services** 

**Digital Workplace Services** 

**Infrastructure Services** 

**Cyber & Operational Services** 

**End User Services** 

**Strategic Sourcing Services** 

**Special IT Services** 

**Public Safety Systems** 

**Command Strategy & Business Office** 

**Command Operating Office** 

### **PEO Digital Command Off**

# Po

#### Command Strategy

#### & Business Office

 Operates the "front door" (i.e., new requirements) in collaboration with PEO leadership, the Product Portfolios through the qualification, funding, solutioning, staffing, and road mapping of the requirements.

#### **Command Operations**

#### Office

- Defines cross-Portfolio process and governance standards and controls
- Governs ("Trust but Verify") decisions and ensures
   delivery aligned with performance and priority
- Connection points between "gears" that orchestrates, removes blockers and ensures continuity for delivery

#### Platform Application Services

- New capabilities primarily aligned to Platform-as-a-Service (PaaS) cloud service model.
- Provides and manages Identity, Credential, Access, Authentication, and Authorization for humans and systems.

#### End User Services

 Provides the physical and virtual device endpoints end users and administrators use to access digital data, voice, and video services.

#### Digital Workplace Services

- Manage virtual access to data hosted across the enterprise, or analyticsheavy that also contain a storage component.
- Services consumed directly by end users to optimize technology, increase productivity and utility, and to enable user output.

#### Strategic Sourcing Services

 Focuses on implementing and managing IT agreements for Navy, USMC, and DoD through research and negotiation, ultimately consolidating, centralizing, and streamlining IT acquisition.

#### Infrastructure Services

- Provides generic compute and structured and unstructured data storage services primarily aligned to Infrastructure-as-a-Service (IaaS) cloud service model.
- Transport to enable the movement of bits and bytes from one endpoint to another.

#### **Special IT Services**

 Focuses on the integration and consolidation of legacy SAP/CAP administrative IT to centralized DON SAP/CAP Enterprise System Network and IT services framework.

#### Cyber & Operational Services

 Provides services implemented for the sole purpose of operating and defending the entirety of the IT portfolio by enabling enterprise-wide visibility, command, and control to administrators or directly to other applications and networks

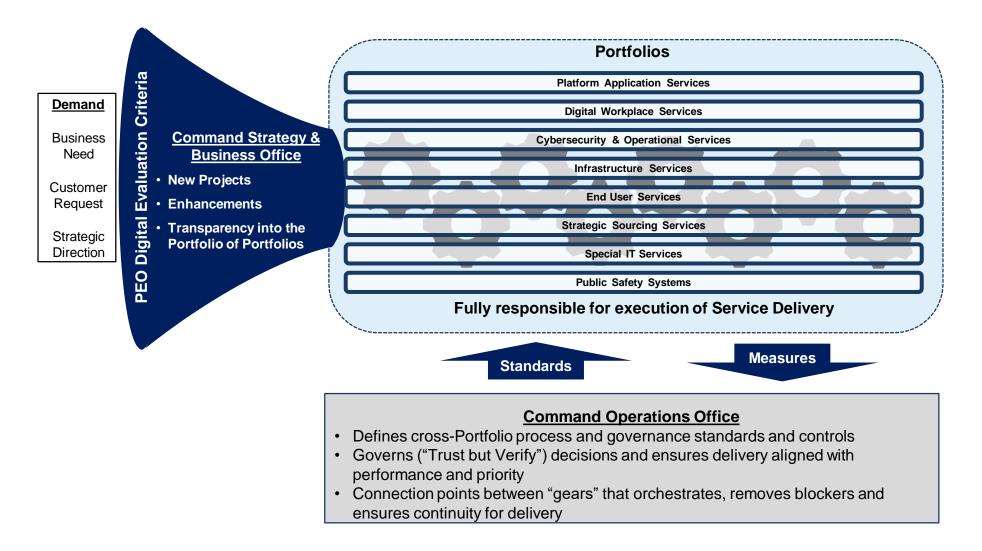

#### **Public Safety Systems**

 Standardizes command and coordination of emergency dispatch centers and functions for First Responders providing notifications, resource management and situational awareness, including wireless communications, networks, and infrastructure

## **PEO Digital Functional View**

Enable portfolios to consistently operate through SAFe practices and provide transparency into streamlined delivery of Naval services

SECNAV SB Offsite Materials NAVWAR/MARCOR HCAs tracking SB goals. NIWC PAC using resellers for Strategic Sourcing, One-Net typically awarded to SB. NIWC LANT preponderance are set up for SB (PM/ENGR Support, 2Twelve ORE)

Navy OSBP on FEDNEWS: "We're educating our workforce and being open to talking to small businesses, talking to industry about upcoming procurements and opportunities so that we can draw in that industrial base that we need to respond to our requirements."

DOD SB Strategy: "Over time, a decline in the number of small businesses participating in defense acquisitions will lead to a reduction of innovative concepts, capabilities, quality of service and increased acquisition costs."

PEO Digital SS enterprise agreements represent 94 unique OEMs that sell through resellers of which greater than 30% are SB.

### Moving the Needle: Ach Measurable Out

### NAVY.

#### Secretary Del Toro Hosts Small Business Roundtable

#### 14 Jul 2022

OSBP's mission is to create a culture of small business inclusiveness across the Navy, to not only best support its mission, Sailors, and Marines, but to ensure fiscal responsibility with taxpayer dollars. OSBP supports President Biden's economic strategy for "small business owners to help lower the cost and level the playing field for families and small businesses."

"Through forums like this, the buyers, purchasers, and contractors collaborate to remove barriers and bring advances through small business opportunities," said Del Toro. "The Department has the opportunity and obligation to impact and leverage small businesses on a federal level. We have to remember that this is both transformative for the business, their communities, and our Navy and Marine Corps."

The federal government's Small Business Administration (SBA) works with federal agencies to award at least 23% of all prime government contracting dollars each year to small businesses that are certified with the SBA's contracting programs. Some of these programs include Service Disabled Veteran-Owned small businesses (SDVOSB), Historically Underutilized Business Zone (HUBZone) small businesses, Small Disadvantaged businesses (SDB) and Women-Owned small businesses (WOSB).

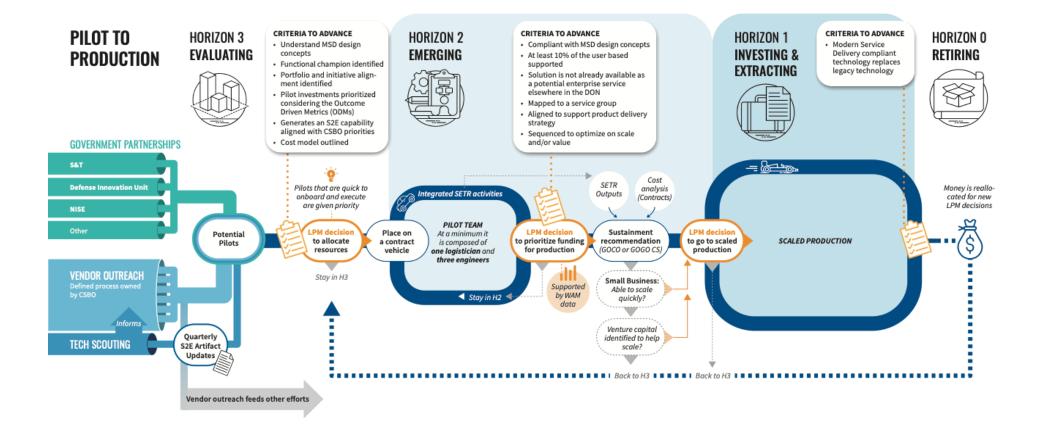

Historically, during World War II and the Korean War, Congress identified thousands of small business concerns due to war-induced shortages of materials and the inability to break into major defense contracts. President Eisenhower signed the Small Business Act into law, which created the SBA. The priority of this law was to 'preserve free competitive enterprise' and fairly award federal contracts among small and large businesses.

WAM is setting the standard within the PEO as others adopt WAMs = GET REAL GET BETTER Significant Accomplishment Examples:

- 6 Exceptions to Policy from the PEO supporting the Flank Speed environment - doing things different
  - Direct impact on 5 WAMs
- Launched 21+ pilots with \$19.6M RDT&E dollars
  - Each pilot has WAM impact identified (1 or more WAMs per pilot)
- Sourced, delivered, and coordinated Starlink Enterprise & Mobility terminals for Operation Triton Peloton
  - Direct impact on Cyber/Ops resilience, reduced user time lost, and improved adaptability/flexibility,
- Created the first PEO DES pilot with Defense Innovation Unit (DIU)
  - Pilot impacting WAMs and process impacting the PEO

# **BrickStor SP is a Cyberstorage solution** for unstructured data

- The only end-to-end Cyberstorage solution
- Active security detects & stops live ransomware attacks
- Stop insider threats, data theft & spillage
- Agentless real time user and entity behavior visibility and analytics
- Instantly recover files affected by attacks
- Audit-ready compliance reporting
- SW-defined NAS, flexible deployment options

Proactive Security and Visibility

# Analysts and Cyber Experts Agree a Change is Needed

**Copyright © RackTop Systems 2022** 

# CISA Zero Trust Maturity Model

### Data is the 5<sup>th</sup> Pillar

- Enable zero trust principles around file access
- Evaluate each request to read, modify or write a file
- Stop suspicious or malicious behavior and enforce policy in real time

# How BrickStor SP Addresses New EO

#### Executive Order 14028

- New Presidential Executive Order Calls for Data-Centric Zero Trust Architecture
  - The BrickStor Security Platform is the only solution available that is evaluating trust and real time policy enforcement on each data operation. Active defense capabilities can stop an insider threat or ransomware before it is too late.
- Improve Detection of Cybersecurity Incidents on Federal Government Networks. Poor logging hampers an organization's ability to detect intrusions, mitigate those in progress, and determine the extent of an incident after the fact.
  - The BrickStor Security Platform provides real time logging and visibility into what users and admins are doing in real time. BrickStor SP becomes a high-fidelity security sensor that provides unprecedent visibility into what is happening to your data with user behavior analytics. Active Defense allows attacks to be contained and creates cyber resiliency. Detailed user behavior activity is used to remediate attacks and restore files to pristine versions and provide timely and comprehensive reporting on incidents.
- Improve Software Supply Chain Security
  - RackTop employs a secure supply chain for software development, delivery and software updates.
- Data Encryption
  - The platform employs AES-256 encryption for data at rest and in flight.

# GIGAOM

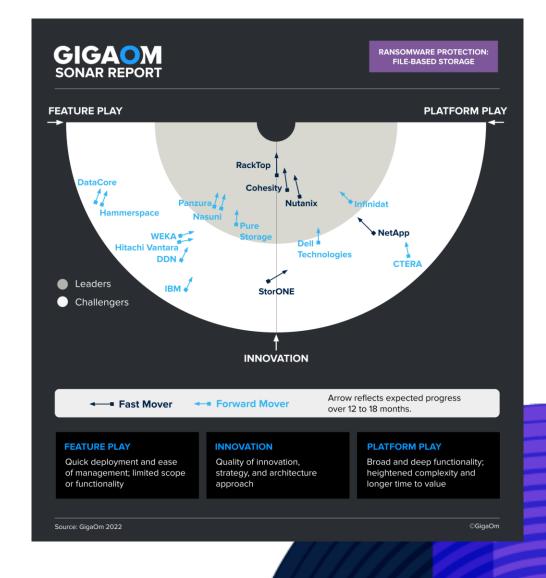

RackTop was judged by GigaOm as the top innovator in the report with the highest rankings for its Cyberstorage solution. Judged to be "one of the most comprehensive and secure offerings for file storage solutions, with a very broad spectrum of features for ransomware protection."

"RackTop provides a no-compromise approach to ransomware protection with a strong zero-trust foundation and a feature set that will continue to deliver long-term value to organizations."

- Enrico Signoretti, Senior Analyst GigaOm

Access the Report Here

# Gartner

According to Gartner, "By 2025, 60% of all enterprises will require storage products to have integrated ransomware and defense mechanisms, up from 10% in 2022"

#### **Storage Needs Active Defense**

View complimentary Gartner research and learn more about RackTop Systems' unique features, among other provider offerings, at https://resources.racktopsystems.com/gartner-research.

#### Gartner disclaimer

Gartner, Hype Cycle for Storage and Data Protection Technologies, 2022, Julia Palmer, 1 July 2022 Gartner does not endorse any vendor, product or service depicted in our research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose. #### Licensed for Distribution IS THIS CONTENT HELPFUL TO YOU? Hype Cycle for Storage and Data Protection YES NO Technologies, 2022 Published 1 July 2022 - ID 600770250 - 73 min read Learn how Gartner By Julia Palmer can help you succeed

This Hype Cycle focuses on emerging innovative storage and data protection technologies and evaluates business impact, adoption rate and maturity level to help infrastructure and operations leaders build adaptable and future-ready storage, and data protection platforms for changing business needs

#### Strategic Planning Assumptions

- = By 2025, 60% of all enterprises will require storage products to have integrated ransomware defense mechanisms, up from 10% in 2022.
- = By 2026, large enterprises will triple their unstructured data capacity stored as file or object storage on-premises at the edge or in the public cloud, compared to 2022.
- By 2025, 60% of I&O leaders will implement at least one of the hybrid cloud architectures, from 15% in 2022
- By 2025, more than 40% of enterprise storage will be deployed at the edge, up from 15% in 2022
- = By 2025, 30% of external enterprise storage arrays deployed to support primary storage workloads will adopt nonvolatile memory express over fabrics, compared with fewer than 5% in 2021

#### Analysis

Gartner

#### What You Need to Know

The storage and data protection market is evolving to address new challenges in enterprise IT. Exponential data growth, public cloud adoption, talent acquisition challenges, new workloads, cyberthreats, requirements to connect and collect everything, and the data governance laws are demanding changes in storage platforms and operational models. Requirements for adaptable, robust, secure, scalable, simple and performant storage and data services are on the rise. As data centers are no longer the centers of data, IT leaders expect to deliver storage services and data platforms capable of hybrid cloud data flow, both at the edge and in the multiple public cloud.

Here, Gartner has assessed 21 of the most relevant storage and data protection technologies to address the evolving needs of the enterprise

For more information about how peer infrastructure and operations (I&O) leaders view the technologies aligned with this Hype Cycle, see 2021-2023 Emerging Technology Roadmap for Large Enterprises.

#### The Hype Cycle

18O leaders responsible for storage and data protection must embrace the changing requirements of digital business, unpredictable data growth, introduction of new workloads, and the desire to leverage public and hybrid cloud that include core-to-edge capabilities. This research informs I&O leaders and infrastructure technology vendors about innovative storage technologies, and illustrates how Gartner evaluates highly hyped emerging technologies or concepts, and how quickly enterprises are adopting them.

More than half of the technologies reviewed in the 2022 Hype Cycle are poised to mature during the next five to 10 years. At the same time, 55% of technologies have a potential to deliver major benefits if driven and justified by genuine business requirements. To provide readers with clearer, more focused research to support their analysis and planning, we've only included a subset of the most innovative technologies and removed the ones which are well adopted and understood

# RackTop's unique Cyberstorage features

- Active defense
- Real-time user behavior analytics
- Incident management
- SIEM integration
- Zero Trust policy enforcement

**RACKTOP**<sup>•</sup> Copyright © RackTop Systems 2022

### **Unstructured Data Management**

#### **Data Services**

- Cyber resilience
- Active Defense
- Data Governance
- Encryption
- Auditing
- User Behavior Auditing and Analysis

#### Data Compliance

- Integrated Compliance Reports
- One Click Fix

#### Life Cycle Management

- Transparent Data Movement (TDM)
- Data Protection Policies and Snapshots
- Compliance Reporting

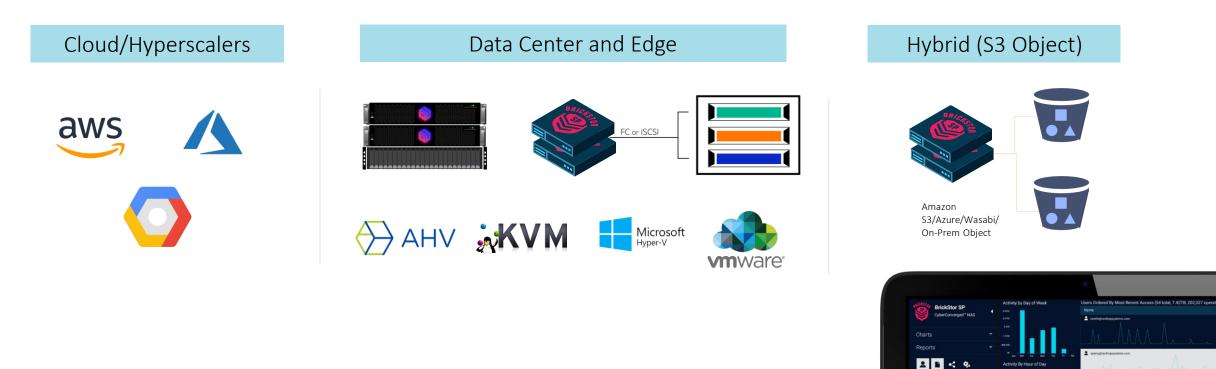

#### **RACKTOP**<sup>\*</sup> Copyright © RackTop Systems 2022

#### **Storage Services**

- File Protocols
- SMB/NFS
- CSI Kubernetes
- Tiering
- Data Backup & DR
- WAN Optimized Replication
- Data Protection
- Data Protection Policies
- Immutable Snapshots
- Data Reduction
- Deduplication
- Compression

### Scale-Right Deployment Model

Store and Protect Enterprise Data ANYWHERE – at the Edge, Core, or Cloud

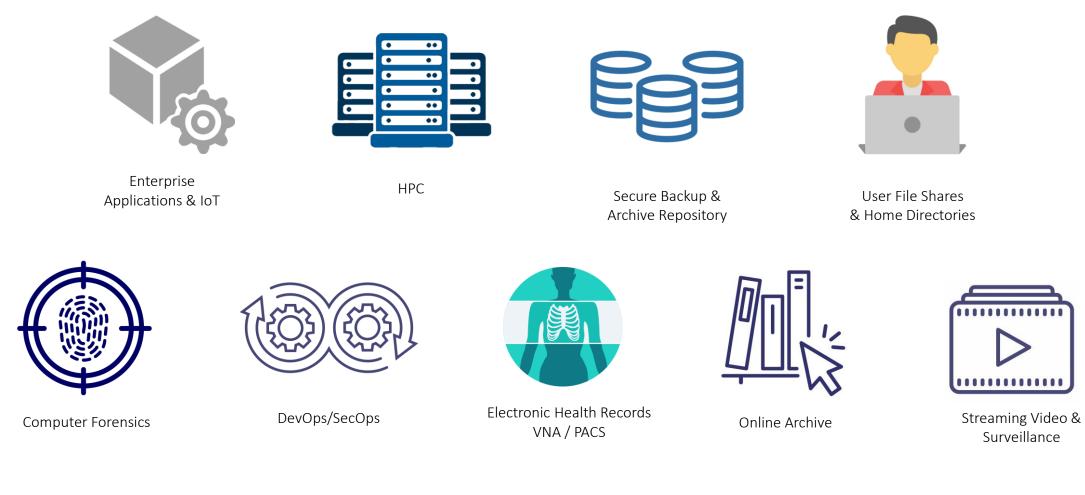

Multi-System Management Through Single Interface

**RACKTOP**<sup>\*</sup> Copyright © RackTop Systems 2022

#### Store and Protect Enterprise Data ANYWHERE – at the Edge, Core, or Cloud

# Jumpstart Program: protect data immediately with the BrickStor SP Virtual Appliance

#### **Promotional Offer**

- Free
- No paperwork, no strings attached
- No commitment software subscription
- Includes two BrickStor SP virtual appliances
- Includes free install and 24/7/365 full support
- Minimum of 4vCPU & 32GB of RAM required

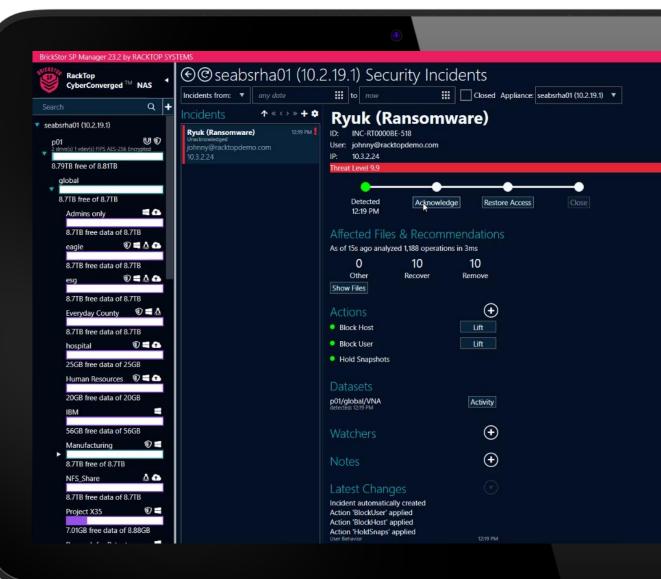

https://www.racktopsystems.com/jumpstart

#### **Active Defense**

#### Real Time Response and Incident Management

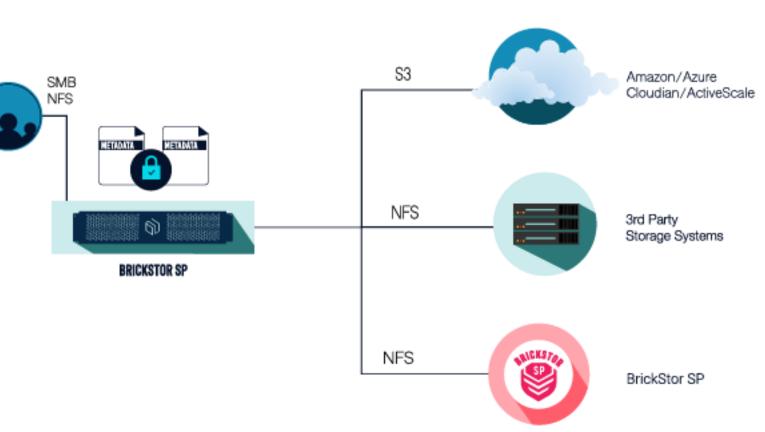

- Detect and stop data exfiltration and ransomware
- Block accounts and hosts from accessing data
- Remediate and track through incident
- Alert and report to other systems
- Create cyber resiliency; contain the attack

### Transparent Data Movement (TDM)

Secure and Efficient Hierarchical Lifecycle Management

- Compress and encrypts before it leaves BrickStor SP
- Maintain control of keys
- Support multiple targets
- Workflow stays the same
- Reduce storage costs

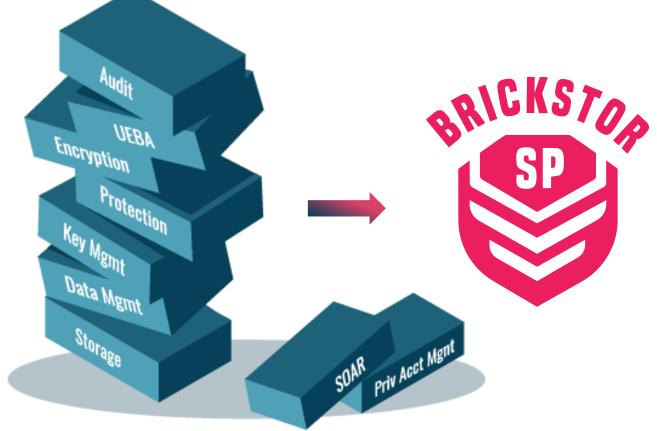

**RACKTOP**<sup>\*</sup> Copyright © RackTop Systems 2022

# Simplified Architecture with CyberConvergence

#### BrickStor SP

- The only unified platform
- Reduces risks
- Reduces third party licensing
- Faster to implement
- Easier to maintain
- Eliminates attack vectors
- Eliminates performance bottlenecks
- Real-time governance

**RACKTOP**<sup>°</sup> Copyright © RackTop Systems 2022
